## **INFORMATION ON THE READINESS OF THE PVA EXPO PRAGUE AREA**

Dear exhibitors,

Yours health and safety are our top priorities.

Trade fairs held in the PVA EXPO PRAGUE complex are organized and prepared in accordance with the currently valid hygienic measures, which are given by the Government of the Czech Republic and the relevant authorities.

Among other things, we are ready for the PVA EXPO PRAGUE complex:

- provide structurally separate sectors for each ordered immediate capacity, and thereby ensure the separation of visitors in the interior
- prepare detailed information and navigation systems including increase of service staff for the greatest possible comfort of visitors and exhibitors
- disinfect common areas more often and provide hand-disinfected stands for visitors and exhibitors
- ensure continuous fresh air circulation - area spreads over a total size of 105,000 msq and thanks to the permeability of the halls, fresh air circulation is ensured even in enclosed spaces
- ensure the possibility of obtaining respiratory protection - a necessity for all participants internal events

At the same time, if, for example, the condition for organizing an event is to identify all participants in the event, we are also systemically prepared for it.

We believe, that together, we will overcome any unfavorable situation and the fair will meet expectations, with which the exhibitor enters it, the visitor and we enter as well.

With respect

Martin František Přivětivý  
Chief Executive Officer
